

Quarterly Board Survey Results

Recently members responded to the quarterly Board Survey which asked what business issues are top of mind. The economy once again topped the list followed by significant concern over the stalling of Kinder Morgan's Trans Mountain Pipeline and the carbon tax. Taxation levels, and government budgets form the next areas that are top of mind followed by trade and infrastructure. Somewhat surprisingly NAFTA scored relatively low given the importance of the agreement to Saskatchewan, particularly given steel tariffs are now a part of the agreement.

Concern about the shortage of labour has all but dried up after being the top area of concern for over a decade. However, there continues to be a shortage of skilled labour in specific industries and the ongoing retirement of boomers will ensure that the supply of labour continues to be an area to watch over the coming years. Information about a range of labour force information will be available at the [Emerging Labour Trends Conference](#) May 16!
