From the Desk of the Chief Executive Officer

The K – 12 school system has begun opening with children heading back to school. No doubt there will be a lot of excitement as kids connect with friends they may have not seen for months.

Since the COVID outbreak Saskatchewan has performed remarkably well. Were we perfect? No, but we have done far better than many other provinces. Over the coming weeks and months, we will need to continue to be vigilant with social distancing, masks, and proper hygiene practices. There has been some chatter on social media pages about the need to wear masks or even the need to be concerned about COVID-19. However, experts in the field are very clear in that this is a major health challenge that needs to be taken seriously.

A COVID-19 vaccine would provide the best protection against the virus. There are a number of different groups working on a vaccine which are at various stages of development. The following [link](#) provides some information about the status of various vaccines.
